DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on April 10th, 2003 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, and 11 are rejected under 35 U.S.C. 102(a) as being anticipated by Nakamura et al (EP 0953550). Nakamura teaches a low-reflectance glass article including a high refractive-index film formed thereon. The film may be formed by sol-gel and may comprise niobium oxide. The refractive index is in the range of 1.91-2.60 (page 6, lines 18-28; claim 1).

Art Unit: 1775

Regarding claim 2, the process step is not considered to structurally limit the article.

Regarding claim 11, the substrate may be soda lime glass (page 8, lines 10-12).

Regarding priority, the instant application's claimed subject matter is given the priority date of the application filing date (November 10, 1999).

Claims 1, 2, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Burns et al (US 5,254,392). Burns teaches an anti-iridescence coating including a high refractive-index layer that may be comprised of niobium oxide with a refractive index of 2.1 (Table A). Burns teaches that this layer may be deposited by sol-gel (col. 11, lines 6-15).

Regarding claim 2, the process step is not considered to structurally limit the article.

Regarding claim 11, the substrate may be soda lime glass (col. 6, lines 63-67).

Claims 1, 2, and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Boire et al (US 6,068,914). Boire teaches an anti-reflection coating including a high refractive-index layer that may comprise niobium oxide (col. 4, lines 10-13). The layer may have a refractive index of 1.90 to 2.60 (col. 4, lines 18-22). Boire teaches that the layer may be deposited by sol-gel (col. 2, lines 50-59; col. 3, lines 20-25).

Regarding claim 2, the process step is not considered to structurally limit the article.

Regarding claim 11, the substrate may be soda lime glass (col. 10, lines 53-55).

Allowable Subject Matter

Claims 12, ¹⁹~~18~~, 20, and 22-24 are allowed.
